EZ Commander

It's never been *easier* to PC in your way

EZ Commander

Entertainment Made Easy

Wouldn't you love to enjoy movies, TV news, and children's educational programs from around the world, free of charge, in the comfort of your living room?
EZ Commander puts this incredible multimedia world in the palm of your hand and makes it as easy as the touch of a button.

Experiencing multimedia entertainment on your PC has never been easier.
EZ Commander makes it as easy as a click through your fingertips. Forget about your desktop keyboard and mouse.

EZ Commander is a wireless trackball mouse and keypad that is used in mid-air, like a remote control. Use the mouse to surf the web for information, news or products. Use the keypad to enter search keywords, type short messages or chat with friends (in more than 10 languages).

Presentations Made Easy

EZ Commander is equipped with a laser pointer and a fully functional mouse and keypad. This means you can manage the Windows desktop (on your PC or laptop) and control your presentations with one convenient handheld device.

Just sit back and relax on your couch while downloading your favorite music, enjoying movies online, or playing games with friends.

Internet Made Easy
